Service Line Analytics

A Solution for the Control of Supply Costs

Service Line Analytics is an on-demand business intelligence solution that accurately gathers, interprets and reports clinical, financial and supply-cost data by service line. It quantifies achievable opportunities, which then provide clear direction for change management. Access to an expert advisor is available to coach your hospital through cost-reduction and sustainment initiatives.

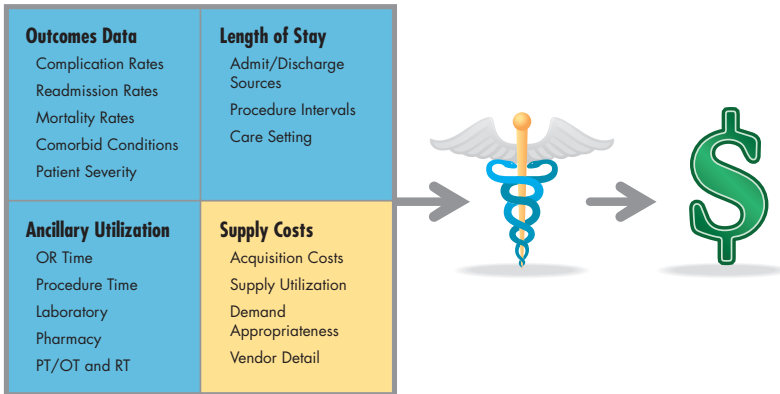

What Will This Solution Do For Me and My Organization?

- Determine what supply spend should be, given the types of patients treated
- Quantify cost-reduction opportunities in both price and utilization of supplies
- Provide detailed data to facilitate physician and clinical team engagement
- Measure progress in achieving cost savings opportunities and maintaining gains
- Provide a consultant coach to guide strategy and the resources to lead the way

Actionable, Credible Data – Supply + Clinical

Based on 15 years of experience from Aspen Healthcare Metrics, a trusted name in healthcare consulting and a MedAssets company, this proven approach is built on the clinical understanding of supply utilization, not just cost. Supplies are put in context with the patients

on which they are used, allowing for a true cost evaluation of patient care. Information is compiled in a way that is physician ready, down to the service line, physician and patient level.

Cost-Reduction Roadmap

The Service Line Analytics solution identifies exactly where savings opportunities exist – both in price and utilization. But, it doesn't stop there. It then provides roadmaps detailing how to implement the changes needed to secure cost reductions.

MedAssets' Value

MedAssets improves healthcare providers' margin and cash flow through revenue cycle and supply chain initiatives, as well as decision support technology and services.

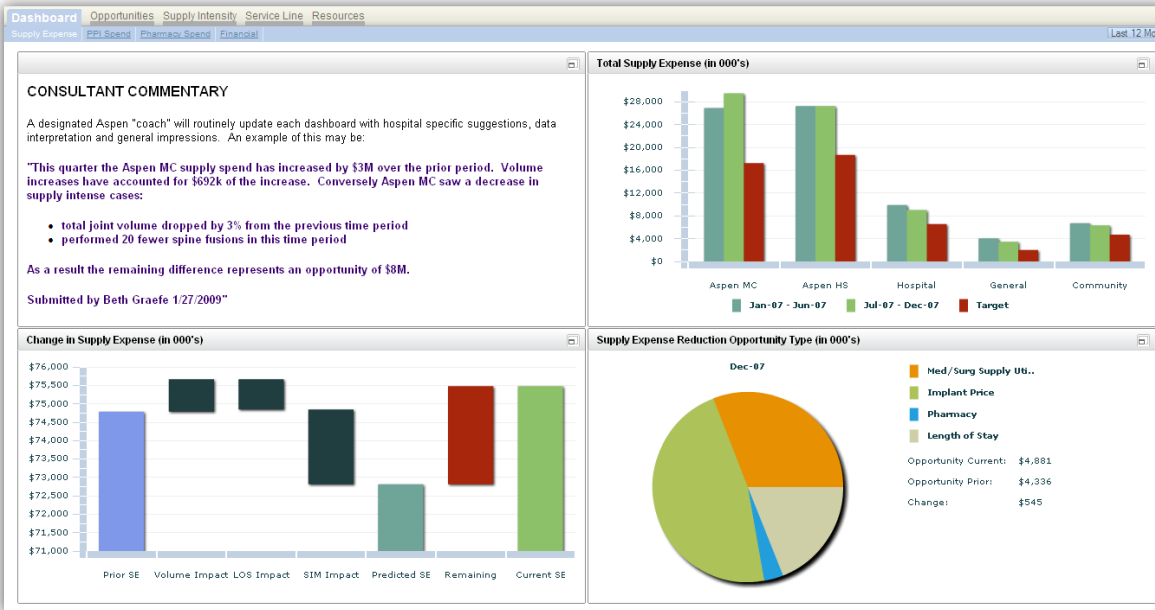

Features At-A-Glance

- Sustainable supply cost control
- Credible and accurate data
- Expert consultant coach

About MedAssets

MedAssets (NASDAQ: MDAS) partners with healthcare providers to improve their financial strength by implementing spend management and revenue cycle solutions that help control cost, improve margins and cash flow, increase regulatory compliance and optimize operational efficiency. MedAssets serves more than 125 health systems, 3,300 hospitals and 30,000 non-acute care healthcare providers. For more information, go to www.medassets.com.

- Data are arranged in a logical manner, from economic and clinical, to supply costs, down to physician detail.
- Guesswork is removed by providing hospitals with immediate and sustainable margin improvement.
- Performance metrics highlight progress toward success.

Dashboard provides easy access to overall progress, cost-reduction opportunities and consultant guidance

Trusted Coach

Providers need successful strategies for lasting change, and with the Service Line Analytics solution, that's exactly what you get. Expert consulting support is provided to educate and advise hospital staff on physician engagement and cost-reduction initiatives.
